Register of Acceptable Commercial Publishers

This Register contains the names of organisations that have been approved by DEST as fitting the definition of a “commercial publisher” for the purposes of the Higher Education Research Data Collection (HERDC).

This Register is not intended as a comprehensive listing of all acceptable publishers and listing on the Register does not mean that DEST endorse the organisation listed or the quality or content of works published.

Note that inclusion on this list does not automatically allow all books published by the organisation to be counted in the collection. Inclusion only indicates that publishing requirements have been met. Other requirements for books and book chapters, as set out in the HERDC specifications, must also be met.

Works published by companies not listed on this Register may still be eligible for counting in the HERDC if they meet the relevant requirements set out in the specifications.

This listing is current at: 31 December 2005

Organisations are listed alphabetically by name, disregarding ‘The’.

Name of Publishers	Country of Origin (if know)
A
